1. Introduction

Deliverable 2.7, ‘Training workshops on mobility recognition practices’ is aimed at introducing learner-centred and skills-oriented recognition of mobility as an innovative pedagogical approach that relies on learning outcomes and as the most important factor for prioritising skills and valuing diversity in order to enable comparability of study programmes for improved automatic recognition of study periods abroad and access to intra-regional connectivity.

For this purpose, in the framework of WP 2, exchange visits to the EU and the 3rd country associated to the programme partners (UP and UKLO) were planned: 1. to observe best practices; and 2. to provide training on academic recognition procedures and learning outcomes. To this end, two visits were organised accordingly—the first to Olomouc, Czech Republic, on 12-16 February 2024, and the second to Ohrid, Republic of North Macedonia, on 26 February – 1 March 2024. The targeted participants were academic staff who sit on recognition committees. Both exchange visits were combined with training workshops on mobility recognition practices in order to learn from good practices and build the capacities of academic staff from WB HEIs participating in MORIN so that they can implement them in their own institutional settings. The training workshops interactively engaged both host and guest participants. A link to a satisfaction survey was sent to participating WB academic staff to provide responses and feedback, useful to improve the content for the upcoming webinars.

The visit to UP was thematically structured around the topic of academic recognition of study periods abroad. The training content of the workshops was proposed to highlight intervention areas for improvement identified in the ‘state-of-the-art’ review report related to recognition via LOs for curriculum transparency and comparability. Concrete examples were discussed in order to make sessions more practical and concrete, based on real scenarios.

The second visit, which was organised by UKLO, was thematically structured on the topic of LOs for student-centred learning for a skills-oriented approach, benefiting the recognition of study periods abroad and impacting student participants long-term.

In this document, we have included all the training materials produced in the framework of these two training workshops. ***To access the training materials, click on the images.***
